

BRUISING

STEP 1:
rase out the
bruise with
n off-
yellow
olor

STEP 2:
add blue
and purple
around the
bruise,
avoiding the
center, keeping
it yellow. add
swamp green
if a transition
color is needed
between the blue
& yellow

STEP 3:
add a variation of bright red & deep red closer
to the center, using the deep red in the center
closest to the yellow. mix the purple with
the deep red to deepen the bruise.

*tip: this technique is
best accomplished using
a stippling sponge &
alcohol paints, though
cream paints work just
as well.

STEP 4:
enhance the colors to make the bruise more severe.
mixing the red & purple near the yellow center, and
green & yellow on the outside provides for effective
transitions on the inner & outer edges of the bruise.

*tip: use a reference picture if
you are unsure of how
to accurately depict a
bruise!
