

SICK/ILLNESS

minimal eyeliner & mascara is needed because the character needs to look weak

create under eye bags using the blurring technique, restricting red tones to the lash line

create the illusion of sickness by hollowing out the cheek bones & temples

↳ use more cool-toned contour shades.
gray may even work for some skin tones.

skin-toned lip color, or just lip balm, is all that is needed - lips don't need to "pop"
